Assignment 7

The github link: <https://github.com/yazbak09/Hello-World-Yazan>

I didn't do any changes in cv html page, so I decided to create another folder named cv_assignment8 in this folder please open app.py folder and you can go forward for required sections by ('/', '/assignment8', '/index', '/about') .

1. Convert your personal website to a Flask project format:

- a. Create static folder, templates folder and app.py file
- b. Put all static files (images, css files, js files, etc.) inside static folder
- c. Put all html files inside templates folder
- d. Create a proper route to your root page ('/') as it was shown in the lecture
- e. Update all existing links inside html files as it was shown in the lecture

2. Create a new route called: 'assignment8'. This route will lead to a new template (created by you) called 'assignment8.html'. This template will, for instance, demonstrate your hobbies or/and preferences in music/art/films.

I created a route assignment8, and html template which also called assignment in, in this page I practiced the following sections:

3. Inside this new template ('assignment8.html'):

- a. Use at list one filter applied on any variable
- b. Demonstrate at list one usage of include function
- c. Demonstrate at list one usage of conditions (if, else, elif)
- d. Demonstrate at list one usage of any kind of loops
- e. Demonstrate at list one usage of a block
